# **NAD+ FOR ADDICTION, BURNOUT, PTSD, ANXIETY & ANTI-AGING**

Watching a loved one (or experiencing it yourself) battle a drug addiction, anxiety or burnout can be painful and confusing. Drug use changes the way a brain functions making quitting with the best intentions almost impossible — even if the user wants to quit.

## **NAD+ WORKS DIRECTLY ON THE AREA OF THE BRAIN AFFECTED & QUICKLY RESTORES FUNCTION**

Nicotinamide Adenine Dinucleotide, or NAD+, is the active enzyme form of Vitamin B3 (niacin). This is a key enzyme in cell function and energy production as well as a neurotransmitter function and production. There is some evidence it acts directly as a neurotransmitter as well. In the process of addiction, the brain is depleted of neurotransmitters and neuronal dysfunction persists. This leads to the endless cycle of use and deterioration of day to day function. At this stage, the brain is largely incapable of participating in recovery or fighting substance abuse and abuse behaviors.

We're very excited to be one of the very few offices in North Carolina that now offer NAD+ treatments in the comfort of our Hydrate Medical clinic.

### **FURTHER QUESTIONS OR TO SCHEDULE TREATMENT:**

Email [info@hydratemedical.com](mailto:info@hydratemedical.com) or call our office at 980-352-0042 and we'll be happy to assist you.

## Who is it for?

- Those who wish to stop being addicted to legal and illegal drugs
- Those with severe anxiety
- Those who want to get over burnout/fatigue
- Those who wish to combat aging
- Those who suffer from PTSD

## What to expect?

You'll be in a comfortable room in our clinic under the care and supervision of an experienced RN extensively trained in NAD+ administration. Treatment will continue for 10 full days and is needed for long-term healing and recovery.

## What results can you expect?

Clients report a significant decrease in cravings often after the first treatment and minimal withdrawal symptoms. This greatly speeds up the recovery process! While we wish we could guarantee success, like all medical treatments, there is no guarantee. General long-term success rates are in the 75%-85% range. Highest success is with stopping all neuroactive substances (legal and illegal) on the day of treatment and never resuming use of these. Having good long-term treatment/counseling can also boost recovery rates. We can refer you if needed.

## NAD+ for Addiction

### Costs:

- 6-9 hours/day for 10 consecutive days
- Customized vitamin and nutrition IV drips on days 1-3, 5, 7 and 9. Drips have been customized by Keith and Jonathan to help the further recovery of the brain and body.
- \$1,000/day = \$10,000 total

## NAD+ for Burnout, PTSD & Anti-Aging

### Costs:

- Twice weekly 3-4 hour infusions
- Customized IV vitamin and nutrient infusion
- Focus on supporting/restoring healthy brain function and healthy body
- \$400/drip and it includes a Hydrate Recovery vitamin drip before each treatment
